	Hidden Gems of Mac OS X <i>Speaker: Sal Soghoian</i> Many of Mac OS X's features are so well-known — thanks to TV commercials, magazine articles, and online overviews — that you were familiar with them before you ever installed the OS or turned on your latest Mac. There are also plenty of great features that Mac owners eventually learn as they use the OS and read up on its capabilities. But then there are the features that go unnoticed — handy tricks and technologies that few people use because they're hidden in various nooks and crannies around the OS, or buried inside obscure utilities and applications. In this session, we take a look the features of Mac OS X that don't make it into TV commercials or keynotes, but are still quite useful. We also look at some of the hidden and underused features of OS X's built-in applications — both the programs you're already using and the ones you've probably never even launched. You'll come away with a new appreciation for Mac OS X's unheralded side.	6:30 PM	8:00 PM	Coral Lounge
