STEVE JOBS & SHAKESPEARE

The "Bebo Scenario"

- ◆ I did not seek out an iPad, but
- ◆ Once I got one, I really became obsessed with whether it could replace my laptop when traveling

Why?

- ◆ Convenience - travel with only one machine
- ◆ Size/form factor - airplane tray tables are impossible for me
- ◆ Multipurpose - entertainment & work
- ◆ Safety & cost
 - ◆ Find your iPad
 - ◆ Remotely "wipe" your iPad

MobileMe gains Find My iPad, Remote Wipe features for iPad

By Jacqui Cheng | Last updated 10 months ago

Apple has extended its popular "Find My iPhone" service to the iPad with its just-announced **iPad-friendly features in MobileMe**. Not only will you be able to find your lost iPad, but iPads will also inherit the iPhone's remote wipe capabilities as well as a number of other features carried over from MobileMe.

The new "Find My iPad" will work on both WiFi and 3G-enabled iPads, though it goes without saying that the WiFi-only version will only be findable while connected to a WiFi network. Like Find My iPhone, users can log into MobileMe to see the approximate location of their iPads and even send a message down to it along with a sound to help you (or a friendly passerby) locate the device. As many iPhone owners have discovered, this feature has been a life-saver for travelers and the absent-minded alike, so it's certainly cool that it's now part of the iPad experience as well.

Apple's MobileMe tweaks also include Remote Wipe for iPad. Just like on the iPhone, you can now wipe your sensitive data (notes, e-mails, etc.) from a lost iPad by going through MobileMe, which can be restored later from a backup on your computer. And, of course, MobileMe's other cloud-friendly features also apply here, including bookmark sync, contact sync, and e-mail sync.

With so many people managing one or more computers, one or more phones, and a tablet device in their lives, services like this can be really helpful. And, if you're an iPhone user, the Find My iPhone/iPad and Remote Wipe services will work for *both* your iPhone and your iPad. Is MobileMe worth the \$99/year subscription yet?

Dropbox

- ◆ Files can be organized into folders, subfolders, etc. - your own hierarchical file system
- ◆ Files are synched
- ◆ Files can be shared
- ◆ Includes a simple Web server
- ◆ Can be used for special purposes

Send email attachments to your Dropbox!

Ever wish you could email files to your [Dropbox](#)? Yeah, me too. So I wrote an application to do just that! It's free, fast, secure and super simple too. All you have to do is [connect with Dropbox](#), get your unique email address, and start sending files! After a few minutes they will automatically appear in your "Attachments" folder. We have some great features too, like automatic archive unzipping, folder organization, and plain text and html message copying, with more on the way! So what are you waiting for?

Connect to Dropbox

By connecting to Dropbox, you are accepting our [legal terms](#) and agree to not use Send to Dropbox to transfer anything illegal or malicious.

This is provided as a free service. If you like and it and think its worth something, send me a donation, my servers run on dollars.

SCOPE

With the advent of Web 2.0 and related technologies, Social Computing has become a new paradigm for the ways we communicate, learn, and educate. Social Media, including Social Networking Web sites, Wikis, blogs, tweets, online groups and forums, podcasts, Web mashups, virtual worlds, recommender/evaluation systems, social tagging/bookmarking, and other related technologies, are enabling innovative behaviors that enable the acquisition, access, manipulation, processing, retrieval, presentation, and visualization of information within a teaching/learning space. Social Media for education has become dynamic, ubiquitous, distributed, real-time, collaborative, bottom-up, many-to-many, value-based, and personalized.

This volume seeks original research with respect to the use of Social Media and related technologies for education; the emerging applications of Web 2.0 as an educational platform; and policy issues including: privacy, risk, and security, that drive, what might be referred to as, "Social Computing for Education 2.0."

This seminal work will provide an important reference of current unique, innovative, and effective uses of Social Media in education for teaching and learning. More specifically, the volume will provide an in-depth analysis of the tools and platforms that are currently being used, or may potentially be used, in a learning environment. It will highlight the future cutting-edge systems that enhance learning spaces.

The book chapters will follow a coherent theme in the use of Social Media in the teaching/learning context, with each chapter exploring in greater detail a different approach or methodology within that theme.

The relevant and important questions addressed include:

- How do Social Media enrich learning and teaching experiences?
- What can be learned from current case studies of state-of-the-art Social Computing/media systems or platforms being used in the learning/teaching setting?
- What are the necessary policies to balance security, privacy, and risk issues in using Social Media for education?
- How can learning be integrated in a distributed and ubiquitous Social Computing environment?
- What methods can be used to assess and evaluate learning and teaching through Social Media?

IMPORTANT DATES

May 15, 2010 Deadline for Extended Abstract
June 1, 2010 Notification of Decision
Aug. 1, 2010 First Complete Submission
Oct. 1, 2010 First Peer Review Feedback
Dec. 1, 2010 Final Camera-ready Submission
Mar. 1, 2011 Expected Publication Date

Social Media Tools and Platforms in Learning Environments: Present and Future

TOPICS

- Web 2.0 techniques and Social Computing for learning (media sharing, media manipulation, conversational arenas, online games, virtual worlds/spaces, social networking, blogging, micro-blogging, podcasts, social bookmarking, recommender systems, collaborative editing, Wikis, RSS, mash-ups)
- Theory and modeling of Social Computing in education
- Social Computing Technology and software for educational application
- Social educational system design and architectures
- Case studies, best practices, and demonstrations of Social Media in educational contexts

IW3C2 Conference Guide: Version 4.1

World Wide Web Conference Overview

Information needed to submit a successful bid for a Conference in the Series

1.1 Introduction

The International World Wide Web Conference Steering Committee (IW3C2) is a committee of organizations who wish to bid to host a Conference in the WWW Conference Series and organizations who have been selected to organize a specific conference in the Series.

The IW3C2 Web site (<http://www.iw3c2.org>) gives general information about IW3C2, and some of the previous conferences in the series are also available.

The World Wide Web Annual Conference (WWW2002) is the major Conference organized by the IW3C2. Each Conference in the Series is organized by a Local Conference Organizer (LCO).

Some of the main issues that characterize the Conferences in the series are:

- **Web Focal Point:** They provide a forum where the International Web community can get together to discuss the latest Web technologies and applications. Delegates expect a professionally user-friendly and enjoyable experience.
- **W3C Update:** The World Wide Web Consortium (W3C) uses the Conference Series as a platform to give an update on its recent technologies and future directions.
- **Industry and Research:** It is the unique nature of this conference that it is aimed at the community from industry to research, or from developers to users and designers. It is the role of the LCO to strike a good balance in the programme between the needs of all communities.
- **Network access:** Due to the nature of the conference, it is required to provide high speed, predominantly wireless Internet access to all delegates and speakers throughout the conference duration.
- **Education:** A major function of each Conference is education. Tutorials, Training Days and throughout the Conference core programme are aimed at satisfying this requirement.
- **Finance Generator:** IW3C2 maintains the profile and quality of the conference series, which involves significant expenditure. Each Conference provides some funding for activities related to the Conference via the IW3C2 Franchise Fee, which is levied on each Conference.

The Franchise Fee of 75 USD for each paid up non-student delegate (50% of this figure for a student delegate) is payable to IW3C2. The fee shall be paid in three instalments: 28 days after the early bird registration date, based on the early bird registration numbers, 28 days after the last day of the conference, and the best available attendance receipts, 14 days after the accounts for the conference have been agreed by both parties. The treasurer of IW3C2 will issue receipts to the conference for all sums received. Payment shall be accompanied by a full list of delegates upon which the calculation of the fee is based. For the first two instalments this shall include details of registered delegates from whom the registration fee is waived. All payments shall be made to the IW3C2 bank account.

Getting Started with Quickoffice Connect™ Mobile Suite for iPad®

Quickoffice Connect™ Mobile Suite Overview

Quickoffice Connect™ Mobile Suite for iPad® takes mobile productivity to the next level by reworking our award-winning productivity suite from the ground up and customizing our application to create an incredible high definition iPad® experience. This iPad enhanced mobile office solution is the best full-featured Microsoft® Office productivity suite tailored specifically for iPad devices with integrated access to multiple cloud services.

This document will give you a brief overview of some of the features contained in this application. For more in depth information about Quickoffice Connect™ Mobile Suite for iPad®, go to <http://www.quickoffice.com/>

File Manager

Using the File Manager

Quickoffice Connect™ Mobile Suite for iPad® allows you to browse through your local and remote folders and files.

- Tap on the local storage or desired online service on the left side of the file manager to see the files stored there

Quickoffice Connect™ Mobile Suite for iPad® takes mobile productivity to the next level by reworking our award-winning productivity suite from the ground up and customizing our application to create an incredible high definition iPad® experience. <Bebo:some notes here for MacMania>

File Manager

Using the File Manager

Quickoffice Connect™ Mobile Suite for iPad® allows you to browse through your local and remote folders and files.

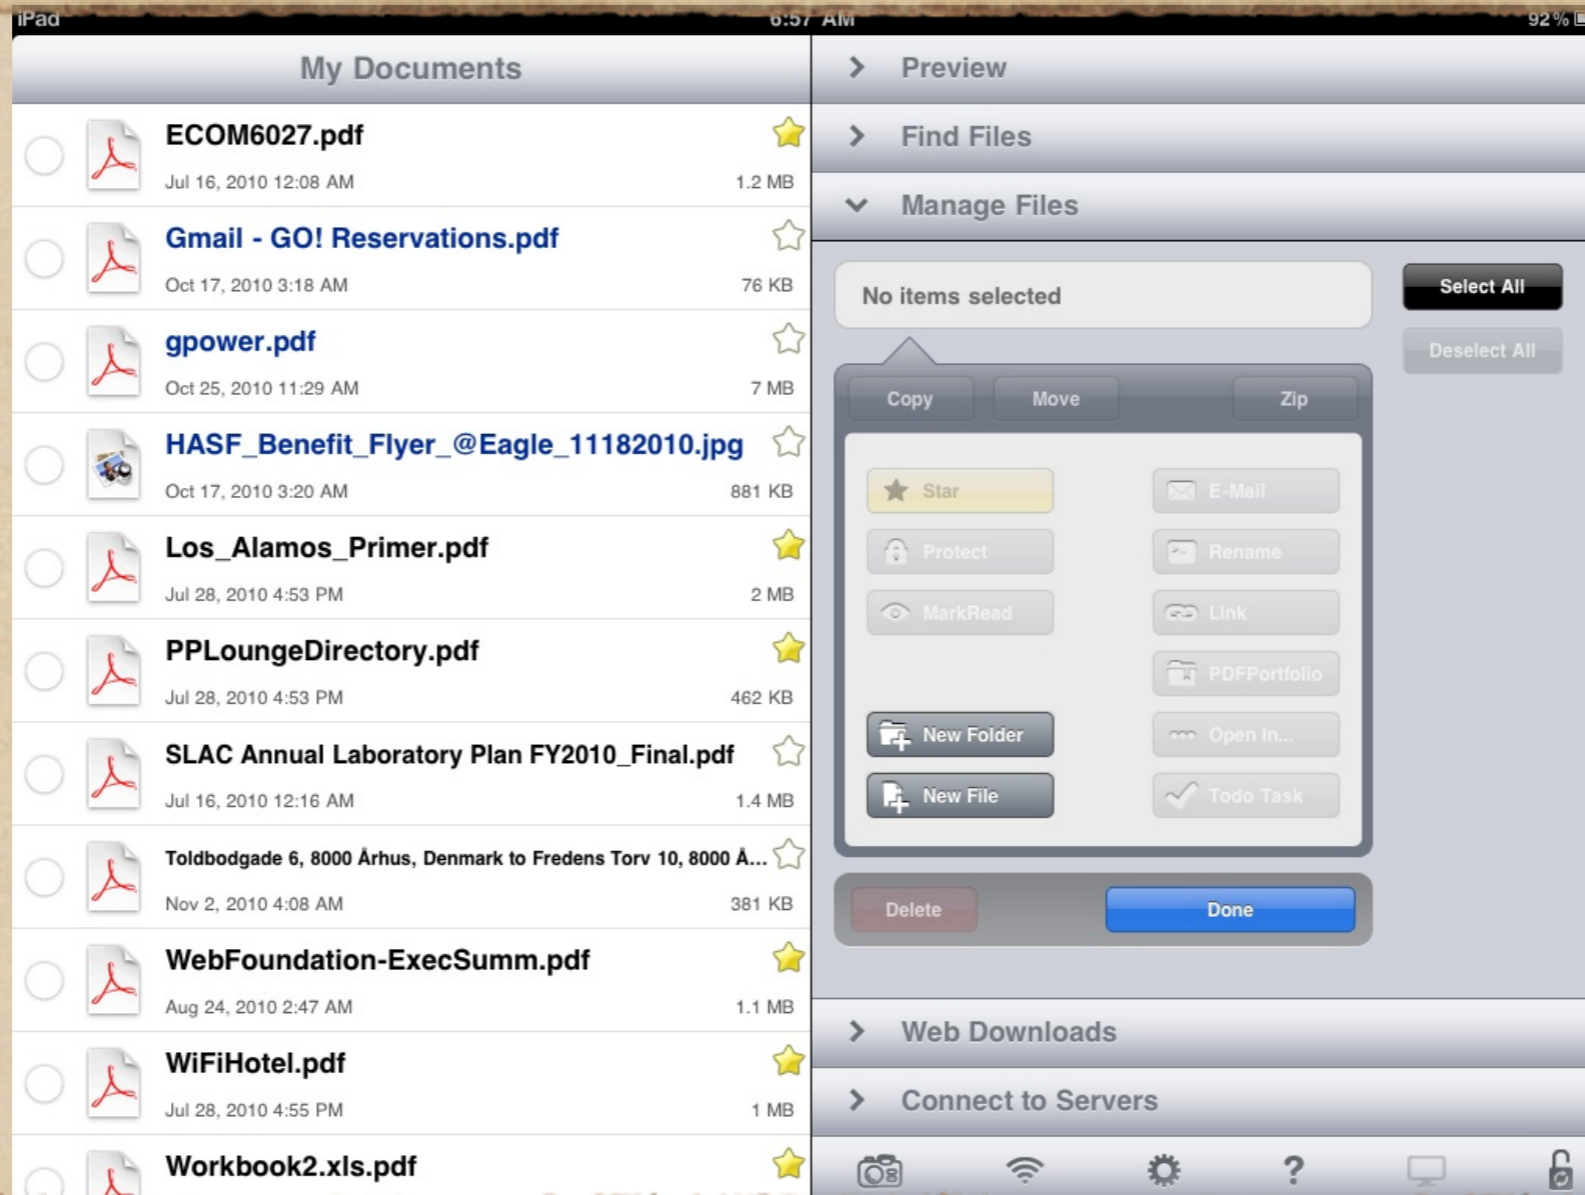

- Tap on the local storage or desired online service on the left side of the file manager to see the files stored there
- Tap on a file to open it, or on a folder to see the contents
- Tap and drag left or right to scroll through the folder hierarchy
- Tap on the blue chevron to see the file information, a visual first page preview of the file, and then tap on the file name in the text box to rename the file

Connectivity

- ◆ There are instances when we have no connectivity/cloud
 - ◆ Vacation
 - ◆ Usually always for work
- ◆ Suppose you're in a hotel room with only a wired connection?
- ◆ Just move files back and forth between cloud and local file system or synch

The Dropbox Public Folder

- ◆ Default folder
- ◆ Items in this folder can be assigned a URI that can be used in e-mail, etc.
- ◆ Could be used for Web page development & testing?

An Easy FTP

- ◆ How many of you have been away and forgotten a file?
- ◆ FTP with no client/server/security hassles
- ◆ Just
 - ◆ Login in remotely
 - ◆ Put the missing file in Dropbox

Printing

- ◆ My "PrintQueue" folder is not a default
- ◆ When files are dropped into that folder
 - ◆ Synched with my other DropBox-defined machines
 - ◆ Triggers an Automator script that
 - ◆ Prints the file to a locally defined printer
 - ◆ Deletes the file
- ◆ Not quite AirPrint...but works on more printers

Conclusions

- ◆ The iPad can be an effective substitute for laptops in many common tasks - it's not a small PC like a net book- "Swept aside by the laptop and iPad, the net book is no longer a contender" (NYT 2/14/2011)
- ◆ There is a small learning curve in order to make the transition - some things are not obvious - the touch interface is adaptable
- ◆ The iPad is good for personal work; enterprise TBD
- ◆ The iPad should adapt well to Web-based or cloud-based services
- ◆ The more data/documents that can reside in the cloud, the better
- ◆ Some great apps are available, but more peripheral support is needed

What Might Come in the iPad 2?

- ◆ USB might give greater variety in peripherals
- ◆ A forward-facing camera could support videoconferencing
- ◆ ??

Thanks!
